

## FITTINGS PRODUCTS

In 2009 PCC purchased the well-known Hackney-Ladish Fittings. The Hackney and Ladish operations make up one of the largest and most versatile fitting manufacturers in the world. The product line ranges from commodity fittings to high-end, heavy-wall fittings and components, serving high-pressure requirements, corrosive environments, heat severity, cryogenic and nuclear applications. Fittings are produced in a variety of materials, in diameters from 2 inches to 48 inches, and in wall thicknesses from 1/2 inch to 2 inches.

Hackney Ladish plants are located in Enid, Oklahoma and Russellville, Arkansas. The product line includes butt weld fittings, elbows, tees, reducers, weld caps and crosses, all produced in-house in a specially-designed, controlled environment. Among the service advantages provided by Hackney Ladish is the ability to provide quality turnkey packages with coordinated delivery.

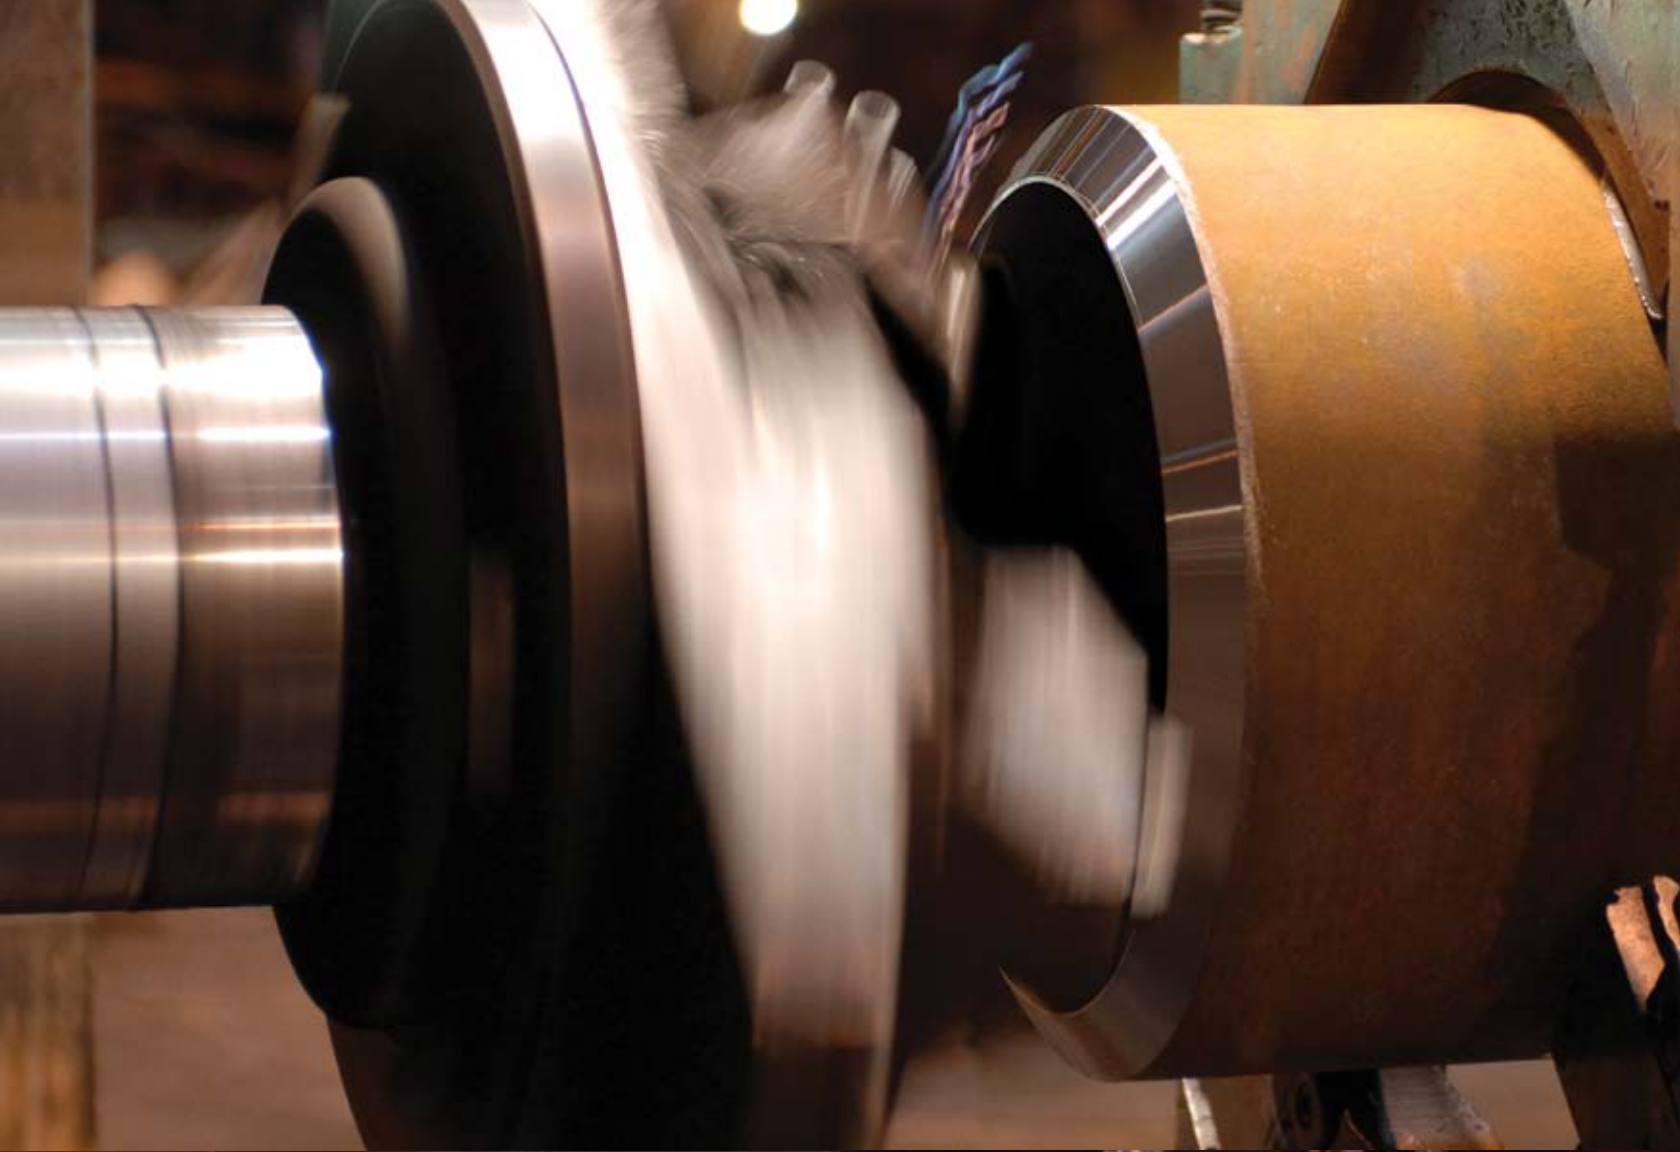

WG Hackney Ladish's priority is quality and traceability. Each fitting is made with unparalleled manufacturing controls, experience, guaranteed accuracy and personalized attention to provide maximum performance and reliability.

Primary among the great number of foreign and domestic industries served by Hackney Ladish are: Coal and gas fired plants, nuclear power and defense plants, boilers, HRSG's and turbines, process plants, refineries, chemical and petrochemical plants, oil and gas transmission, trunk and gathering lines and pump stations.
